Maharashtra State News

<p>Maharashtra Ancient Monuments and Archaeological Sites and Remains Act, 1960</p>	<p>Why in the news?</p> <ul style="list-style-type: none"> The Maharashtra state government has notified geoglyphs and petroglyphs in Ratnagiri as 'protected monuments' under the Maharashtra Ancient Monuments and Archaeological Sites and Remains Act, 1960. <p>About the act:</p> <ul style="list-style-type: none"> The Maharashtra Ancient Monuments and Archaeological Sites and Remains Act, 1960 is a legislative framework aimed at preserving ancient and historical monuments, archaeological sites, and remains within the state of Maharashtra. Protected Monuments: The Act allows the state government to declare certain ancient and historical monuments as protected monuments. Preservation and Maintenance: It includes provisions for the preservation and maintenance of these monuments, including agreements with owners and the acquisition of rights. Archaeological Sites: The Act also covers the declaration of archaeological sites and remains as protected areas, with restrictions on property rights to ensure their preservation. Excavations and Antiquities: It regulates archaeological excavations in protected areas and the handling of antiquities discovered during such excavations. Penalties and Enforcement: The Act outlines penalties for violations and provides mechanisms for the enforcement of its provisions.
<p>Institutional Capacity Building Project</p>	<p>Why in the news?</p> <ul style="list-style-type: none"> Chief minister of Maharashtra launched the Institutional Capacity Building Project, a \$188 million programme with the help of the World Bank. <p>About Institutional Capacity Building Project:</p>

Daily Current Affairs Encyclopedia

	<ul style="list-style-type: none"> • Aim: To promote district-level development in Maharashtra. • Recommended by the Maharashtra Economic Development Advisory Council. • Focus on income growth and development at the district level. • The Maharashtra government will receive Rs 1,562 crore from the World Bank for this project.
Maharashtra Resilient Development Program	<p>Why in the news?</p> <ul style="list-style-type: none"> • The Chief minister of Maharashtra launched the Maharashtra Resilient Development Program, with the help of the World Bank. <p>About Maharashtra Resilient Development Program:</p> <ul style="list-style-type: none"> • Focus: Controlling the flood situation in the Krishna Bhima basin, particularly in Kolhapur and Sangli districts. • The project is worth Rs 3,200 crore. • Rs 2,240 crore financial assistance will be provided by the World Bank. • This initiative is part of a broader effort to enhance the state's resilience to climate-related challenges and promote sustainable development.
Sonar system at Totladoh reservoir	<p>Why in the news?</p> <ul style="list-style-type: none"> • The Pench Tiger Reserve (PTR) in Maharashtra has taken a significant step by deploying an advanced sonar system to combat illegal fishing in the Totladoh reservoir. <p>Key points:</p> <ul style="list-style-type: none"> • This technology can detect objects hidden up to 500 feet underwater, making it much harder for fishermen to evade detection. • Despite the ban on fishing in the tiger reserve under the Wildlife Protection Act (WPA) 1972, illegal fishing activities have persisted. • The sonar system is expected to enhance the enforcement of these laws by identifying and locating hidden boats and other objects underwater.
Sonar system	<p>Why in the news?</p> <ul style="list-style-type: none"> • The Pench Tiger Reserve (PTR) in Maharashtra has taken a significant step by deploying an advanced sonar system to combat illegal fishing in the Totladoh reservoir.

**About Sonar system:**

- **SONAR** stands for **Sound Navigation and Ranging**.
- It is a **technology that uses sound waves to detect objects, measure distances, and navigate underwater environments**.
- **Applications:**
 - **Military:** Used in submarines and ships for navigation, detecting other vessels, and underwater warfare.
 - **Navigation:** Helps in navigation by detecting underwater obstacles, measuring depth, and guiding vessels.
 - **Fishing:** Locates schools of fish and other marine life.
 - **Oceanography:** Used in mapping the seafloor, studying marine habitats, and detecting underwater geological features.
 - **Search and Rescue:** Locates submerged objects, such as wreckage or drowning victims.
- **Working Principle:**
 - **Sound Waves:** Sonar systems emit sound waves that travel through water, bounce off objects, and return as echoes.
 - **Echo Analysis:** The time taken for the echo to return is used to calculate the distance and location of the object.
