Directions (161-170): Read the following passage carefully and answer the questions given below it. Certain words are given in bold to help you locate them while answering some of the questions.

The furor in the international community over the actions of the Myanmar armed forces in Rakhine state in recent weeks has led to widespread criticism of the civilian National League for Democracy (NLD) government, unofficially led by Daw Aung San Suu Kyi. A central theme of the criticism has been that the Nobel Prize winner either agrees with the ethnic and sectarian bigotry of a large part of Myanmar's electorate, or that she is afraid to confront it due to electoral concerns and a fear of being seen as bowing to foreigners. However, this analysis misses a key factor in the political landscape of modern Myanmar: the tie between the country's experiment with a civilian-led semi-democracy and the rise in living standards for ordinary people this change in the political system is meant to bring about.

As the Myanmar armed forces have demonstrated so brutally against the minority Rohingya, for its legitimacy as an institution the military (the Tatmadaw) in Myanmar can still draw upon the idea of itself as the chief defender of Myanmar's territorial integrity and guarantor of the majority Bamar elite's continued dominance within it. The Tatmadaw also still control the ministries of defense, home affairs, and border affairs, and a quarter of the seats in Myanmar's parliament. Meanwhile the NLD is responsible to a diverse electorate that seems, now, united only by its loathing of the Rohingya. Much of that electorate has grown up listening to Myanmar's generals (and their successors) **lambasting** the practice of democratic civilian government in order to justify the Tatmadaw's coups in 1962 and 1988 against the legitimate rulers of Myanmar. Despite 50 years of military misgovernment, charges that civilian rule is corrupt, inept at ruling the country, and unable to achieve peace and security still carry weight in a society which has been at war with itself since independence in 1947.

Some of the **major** priorities of that electorate can be seen from the responses to an opinion survey published in August by the International Republican Institute (IRI), a U.S.- based pro-democracy nonprofit. IRI interviewed 3,000 adult citizens (those eligible to vote) of Myanmar, who were weighed by state and region, on their views about “their socio-economic status, political and security situations of the country, the democratic transition and rights, and perceptions of government, legislature, political parties and the media” according to local media outlet The Irrawaddy. For supporters of Myanmar’s transition to democracy this survey of public opinion **revealed** some disturbing results. Eye-opening for democracy activists, a large percentage of the electorate seemed ready to judge not the NLD, but the democratic system itself for Myanmar’s economic performance. According to the IRI, 40 percent of their respondents thought that the economy was more important than democracy, versus just 24 percent who rated democratic reform as being more important overall. Another 11 percent of those surveyed rated further democratic reform as “moderately” important. The Irrawaddy added that the IRI’s report even showed ordinary people putting economic development ahead of the country’s complex peace process, a central plank of Aung Sang Su Kyi’s political program. The central thrust of the survey’s **revelations** was any government of Myanmar would only be broadly liked and accepted if it could solve local people’s livelihood difficulties. This would matter less for the NLD in its struggle with the Tatmadaw if Myanmar’s economic growth was still increasing. However, growth fell from 7.3 percent in 2015-2016 to 6.4 percent in 2016-17, and while the current year’s forecast is a more cheerful 7.7 percent, (and 2018-19’s estimate is even higher) that sunny scenario is heavily dependent on getting billions more dollars-worth of Foreign Direct Investment (FDI) into the country’s economy. With foreign governments and businesses now mulling how to respond over the Tatmadaw’s unprecedented **rampage** across Rakhine state (which has now seen a record 480,000 Rohingya fleeing to unsafe and unhealthy refugee mega-camps Bangladesh) this hoped-for investment is now at risk. So far investors have held their nerve but they are keenly aware of how Myanmar is **perceived** internationally.

Q161. Why is Daw Aung San Suu Kyi not taking a firm stand on Rohingya crisis?

Sol. A strong leadership ensures that the school maintains discipline and order, which is essential for creating a positive learning environment. Option (b) is also correct, but it is a secondary benefit of good leadership. Option (c) is incorrect because leadership is not optional. Every school needs a leader to function effectively. Option (d) is incorrect because leadership has a significant impact on the school environment.

S52. Ans.(d)

Sol. Students can contribute to their own learning by actively participating in discussions and activities, completing assignments on time, and asking questions and seeking clarification. Option (a) is correct because active participation promotes engagement and helps students retain information better. Option (b) is correct because completing assignments on time helps students stay organized and manage their time effectively. Option (c) is correct because asking questions and seeking clarification helps students better understand the material and clear up any confusion.

S53. Ans.(c)

Sol. Punishing teachers for student misbehavior, is not a way to promote social maturity in teachers. Punishment can lead to negative emotions and resentment, which can hinder the teacher's ability to develop socially mature responses. On the other hand, providing training and professional development opportunities, encouraging collaboration and teamwork among teachers, and providing opportunities for self-reflection and feedback are all effective ways to promote social maturity in teachers. Training and development opportunities can provide teachers with the necessary skills and knowledge to manage social interactions effectively. Collaboration and teamwork can help teachers develop empathy and effective communication skills, while self-reflection and feedback can help teachers identify areas for improvement and develop a growth mindset.

S54. Ans.(c)

Sol. Using a variety of teaching methods to accommodate different learning styles, is an example of professional commitment in teaching. Professional commitment refers to a teacher's dedication to their profession, students, and ongoing learning. By using various teaching methods, teachers can provide students with a personalized learning experience that caters to their individual needs and abilities. In contrast, focusing only on delivering the curriculum without considering students' interests, ignoring students' questions and concerns outside of class hours, and refusing to attend professional development opportunities are not examples of professional commitment. These actions can hinder a teacher's ability to provide the best possible learning experience for their students and limit their professional growth.

S55. Ans.(c)

Sol. the teacher's ability to establish positive relationships with students and colleagues, best describes interpersonal relations in teaching. Interpersonal relations in teaching refer to the teacher's ability to interact with and relate to others, including students, colleagues, and parents. Positive relationships with students and colleagues can foster a supportive and collaborative learning environment that benefits everyone. In contrast, options A, B, and D focus on specific aspects of teaching, such as behavior management and academic support, but do not capture the broader scope of interpersonal relations. While these aspects are important, they are just one component of effective teaching that involves building positive and meaningful relationships with students and colleagues.

S56. Ans.(d)

Sol. studying consistently and seeking help when needed, is the best way for students to improve their grades in school. Consistent studying allows students to understand and retain the course material, while seeking help when needed ensures that they have a clear understanding of any challenging concepts. Options A, B, and C are unethical and can result in serious consequences, including failing grades, academic probation, and even expulsion. Cheating and paying someone to do assignments undermine the academic integrity of the institution and do not reflect the student's actual knowledge or abilities. Similarly, skipping classes can result in missed learning opportunities and lower grades. Therefore, it's important for students to prioritize consistent studying and seek appropriate help when needed to achieve academic success.

S57. Ans.(c)

Sol. Offering regular updates and finding ways to address parent concerns, is an effective way for teachers to communicate with parents. Communication with parents is essential for building a strong home-school partnership that supports student success. Regular updates, such as progress reports or parent-teacher conferences, provide parents with valuable insights into their child's academic and social progress. Addressing parent concerns demonstrates a teacher's commitment to their student's well-being and can help to build trust and rapport. In contrast, options A, B, and D are not effective ways to communicate with parents. Ignoring parent concerns, blaming parents for their child's behavior or performance, or refusing to communicate altogether can damage the home-school relationship and hinder student success. Therefore, effective communication with parents requires a collaborative and solution-oriented approach that fosters mutual respect and understanding.

S58. Ans.(b)

Sol. Creating a supportive and engaging learning environment, is an effective way for a teacher to promote intrinsic motivation in students. Intrinsic motivation is the desire to engage in an activity for its inherent satisfaction rather than for an external reward. A supportive and engaging learning environment can foster intrinsic motivation by promoting student autonomy, providing opportunities for choice and exploration, and connecting learning to student interests and goals. On the other hand, offering extrinsic rewards for good performance, ignoring student motivation, and criticizing students for their lack of motivation can undermine intrinsic motivation by focusing on external factors and creating pressure and anxiety. Therefore, promoting intrinsic motivation requires a student-centered approach that values student voice and choice, supports student curiosity and creativity, and provides opportunities for meaningful learning experiences.

S59. Ans.(c)

Sol. offering specific feedback on areas for improvement and providing guidance on how to improve, is an effective way for an ideal teacher to provide feedback to students. Effective feedback provides students with clear and actionable insights into their work, highlighting both their strengths and areas for improvement. Specific feedback can help students identify areas where they need to focus their efforts and provide guidance on how to improve their work. In contrast, options A, B, and D are not effective ways to provide feedback. Criticizing student work without offering suggestions for improvement can be demotivating, while focusing solely on positive feedback can create a false sense of achievement and hinder student growth. Ignoring student work altogether can lead to missed learning opportunities and undermine the teacher-student relationship. Therefore, an ideal teacher should provide constructive feedback that supports student learning and growth.

S60. Ans.(b)

Sol. The role of teachers in the development of moral values among students is to provide guidance and support. Teachers should act as role models and demonstrate ethical behavior in their interactions with students. They should encourage honesty, integrity, empathy, and respect for others. Option (a) is incorrect as it is unethical and goes against the purpose of moral development. Option (c) is incorrect as it promotes negative behavior, while option (d) is incorrect as it goes against the goal of developing moral values in students.

S61. Ans.(d)

Sol. Physical appearance is not a factor that affects moral development. Factors that influence moral development include family values (option a), peer pressure (option b), and cultural norms (option c). Family values play a significant role in shaping a child's moral beliefs and behaviors. Peer pressure can influence a child's ethical decision-making and behavior, while cultural norms can affect a person's sense of right and wrong. Option (d) is incorrect as it is not relevant to moral development.

S62. Ans.(b)

Sol. Cultural differences can be a barrier to effective communication in school because students from different cultures may have different ways of communicating, which can lead to misunderstandings and misinterpretations.

Option (a) is incorrect because active listening is a practice that enhances effective communication rather than a barrier to it. Active listening involves giving full attention to the speaker, understanding their message, and responding appropriately.

Option (c) is incorrect because clarity of message is a characteristic of effective communication, not a barrier to it. A lack of clarity in the message can be a barrier to communication, but clarity itself is not a barrier.

Option (d) is also incorrect because understanding of subject matter is necessary for effective communication to take place. However, a lack of understanding of the subject matter can be a barrier to communication.

S63. Ans.(c)

Sol. When selecting instructional materials, it is important to choose materials that are directly relevant to the learning objectives and will help students to achieve the intended outcomes.

Option (a) Cost can be a consideration, but it should not be the primary factor in selecting instructional materials.

Option (b) Popularity may not be a reliable indicator of the effectiveness of instructional materials.

Option (d) Availability at local stores may not be relevant if the best instructional materials are not available locally.

S64. Ans.(c)

Sol. The correct answer is option (c) Sequencing activities logically and purposefully. Learning activities should be organized in a way that makes sense and helps students to progress towards the learning objectives.

Option (a) Randomly selecting activities may not lead to a cohesive and effective lesson plan.

Option (b) Grouping activities by their length may not be the most effective way to organize activities, as the length of an activity does not necessarily indicate its importance or relevance.

Option (d) Allowing students to choose their own activities may not be effective in ensuring that they are working towards the learning objectives.

S65. Ans.(d)

Sol. A principal's role in student assessment is to develop assessment policies that align with state standards and are implemented consistently across the school. Option (a) is incorrect because creating assessment tools is the responsibility of the teacher or department head. Option (b) is incorrect because grading student work is the responsibility of the teacher. Option (c) is incorrect because providing feedback to students and teachers is a collaborative effort involving the teacher and the principal.

S66. Ans.(b)

Sol. The most effective way to reform a child's aggressive behavior is by investigating the underlying reasons for their behavior. It's crucial to identify the triggers, such as stress or trauma, that may be causing the aggression and address them. Isolation and severe punishment can worsen the behavior and have negative long-term effects on the child's mental health. Ignoring the behavior can also lead to escalation and reinforce the aggressive behavior. Other helpful strategies may include positive reinforcement, teaching coping skills, and seeking professional help if needed.

S67. Ans.(d)

Sol. The appropriate action to take as the Principal of the school if a teacher doesn't arrive on time for a school function is to remind the teacher of their responsibilities and inquire about the reason for their tardiness. Publicly reprimanding the teacher or filing a complaint can cause humiliation and create an unpleasant work environment. Scheduling a meeting after the function can also be a helpful approach to address the issue constructively. It's essential to maintain a professional and respectful attitude towards the teacher while emphasizing the importance of punctuality and responsibility in their role as an educator.

S68. Ans.(a)

Sol. As a school administrator, the most effective attitude to adopt to prevent social evils from impacting the school environment is an optimistic one. An optimistic attitude can inspire hope, create a positive atmosphere, and encourage collaboration among teachers, students, and parents. A pessimistic attitude can lead to a negative mindset and discourage proactive measures to address social issues. Similarity to other teachers or indifference can create complacency and hinder the necessary actions to address social evils. It's crucial for school administrators to remain optimistic while recognizing the challenges and taking proactive steps to create a safe and supportive environment for all members of the school community.

S69. Ans.(d)

Sol. The potential positive outcome of informing students about their exam performance soon after the exam has ended is to strengthen their inspiration. When students receive timely feedback on their exam performance, they can assess their strengths and weaknesses and take appropriate measures to improve. This can help them set realistic goals, develop effective study habits, and build their confidence. Humiliating or punishing students can have a negative impact on their self-esteem and discourage them from learning. Tempting them with rewards can create a superficial motivation that may not last. It's essential to provide feedback in a constructive and supportive manner, emphasizing the areas for improvement while acknowledging their efforts and accomplishments.

S70. Ans.(b)

Sol. The responsibility of a class teacher towards maintaining discipline in the classroom is to create a supportive and inclusive classroom environment that promotes positive behavior and learning. Ignoring disruptive behavior or encouraging students to act out can escalate the situation and hinder the learning process. Punishing students for every behavior that disrupts the learning environment can create a negative atmosphere and impact their motivation and self-esteem. It's crucial for class teachers to establish clear expectations and rules for behavior, model respectful and responsible behavior, and provide positive reinforcement for good behavior. They should also address any disruptive behavior promptly, communicate with students and parents, and seek support from school counselors or administrators when necessary.

S71. Ans.(a)

Sol. Mental development refers to development which enables a child to explore and process information to learn and understand the things around him. Interaction, stimulation and play are the important factors that assure the mental development of a child.

S72. Ans.(c)

Sol. Learning objectives help the teacher guide students as they work through the course, and to assess their learning progress. Excellent learning objectives provide a guide for students when reviewing materials and preparing for assessments.

S73. Ans.(d)

Sol. Teachers can leverage technology to achieve new levels of productivity, implement useful digital tools to expand learning opportunities for students, and increase student support and engagement

S74. Ans.(d)

Sol. Leading teachers play a critical role in improving the skills, knowledge, and performance of their colleagues. They provide professional development opportunities, offer feedback and coaching, and model effective teaching practices. Leading teachers also collaborate with other teachers and school leaders to develop and implement effective teaching strategies and curricula. By supporting the ongoing professional growth of their colleagues, leading teachers help create a culture of continuous improvement that promotes student learning and achievement.

S75. Ans.(a)

Sol. Schools must frequently engage with parents to ensure the academic progress of their students. Regular communication with parents can provide important insights into a student's strengths, weaknesses, and learning styles. It can also help parents understand how they can support their child's learning at home. Additionally, involving parents in school activities and events can promote a sense of community and encourage parental involvement in their child's education. Collaborating with parents can improve student outcomes and help create a positive and supportive learning environment.

S76. Ans.(a)

Sol. Children will learn only in an atmosphere where they feel they are valued. Children need to feel that each one of them, their homes, communities, language and cultures are valuable as resources for experience to be analysed and required at school.

S77. Ans.(d)

Sol. Maintaining discipline in class is important but not as important as other factors. The purpose of teaching, are to help students to

- Acquire, retain and be able to use knowledge
- Understand, analyse, synthesise and evaluate skills
- Establish habits
- Develop attitudes

S78. Ans.(b)

Sol. The teaching must be done from known to unknown concepts, i.e. the concept of society should be taught first and then the concept of state or a world should be taken into the picture.

S79. Ans.(d)

Sol. Non-involvement of students in activities is one of the most potent reasons for student indiscipline in schools. When students feel disconnected from the school community and lack meaningful engagement, they may become disengaged, apathetic, and prone to disruptive behavior. Involving students in activities such as sports, clubs, and volunteering can provide them with a sense of purpose, belonging, and accomplishment. This can foster positive behavior, promote student well-being, and enhance the overall school culture.

S80. Ans.(b)

Sol. The most appropriate attitude for a teacher to exhibit when a student is consistently disruptive in class is empathy and understanding. Punitive and authoritative attitudes can escalate conflict and damage the teacher-student relationship. Indifferent and distant attitudes can exacerbate the problem and make the student feel isolated. Humorous and lighthearted attitudes can undermine the seriousness of the situation. Empathy and understanding can help the teacher identify the root cause of the behavior and work collaboratively with the student to find a solution.

S81. Ans.(d)

Sol. Transactional leadership style is characterized by a leader who is highly focused on achieving goals and rewards team members for meeting objectives. This style works well in a structured environment where tasks are clearly defined, and rewards can be easily measured.

S82. Ans.(b)

Sol. Written communication is the best type of communication for addressing issues related to school policies or procedures with staff members. It provides a record of the communication and can ensure that everyone has a clear understanding of the issue and the steps being taken to address it. Written communication can take the form of memos, emails, or policy manuals.

S83. Ans.(b)

Sol. Interpersonal relations in teaching refer to the teacher's ability to establish positive relationships with students and colleagues. It involves effective communication, active listening, and empathy toward students and colleagues.

S84. Ans.(c)

Sol. A teacher can improve interpersonal relations with colleagues by respecting their opinions and perspectives. This involves active listening, giving credit where credit is due, and showing empathy toward their challenges and struggles.

S85. Ans.(a)

Sol. Awareness is crucial in teaching as it helps teachers understand their students' needs, abilities, and limitations. This allows teachers to tailor their teaching methods to meet the specific needs of each student, which can lead to better academic outcomes.

S86. Ans.(a)

Sol. Communication refers to the ability to convey information clearly and effectively. This is important for teachers as they must be able to communicate their lessons and ideas to their students in a way that is easy to understand and engaging.

S87. Ans.(d)

Sol. Cultural competence involves understanding and respecting cultural differences and is important for anyone who interacts with people from different cultural backgrounds. It involves being aware of one's own cultural biases and assumptions and being able to adapt one's communication and behavior to be more effective in a multicultural context.

S88. Ans.(b)

Sol. The primary goal of a school's professional development program is to develop teaching skills and knowledge. Professional development programs provide opportunities for teachers to learn new teaching strategies, deepen their content knowledge, and stay up-to-date with the latest research in education. Professional development can also promote teacher collaboration, which can enhance the overall school culture and improve student outcomes. While maintaining teacher certification and monitoring teacher performance may be part of a professional development program, the primary goal is to promote ongoing learning and growth for teachers.

S89. Ans.(c)

Sol. Disrupting classes and causing distractions. This is not a role of a student in a school environment and can negatively impact the learning experience for others.

S90. Ans.(c)

Sol. Inspiring and motivating team members is a key characteristic of a transformational leader. These leaders have a clear vision for the future and inspire their team members to work toward achieving that vision. They encourage creativity and innovation and are not afraid to take risks to achieve their goals.

S91. Ans.(d)

Sol. Verbal communication is the best type of communication for providing instructions or directions to students. It allows for immediate clarification and can be tailored to individual needs. Verbal communication can take place in the classroom or during individual conversations.

S92. Ans.(b)

Sol. Social awareness is essential in promoting gender equality in schools. It involves recognizing and challenging gender stereotypes, bias, and discrimination. Teachers and students should work together to create an inclusive learning environment that promotes gender equality and respects diversity.

S93. Ans.(c)

Sol. A teacher can promote self-discipline among students by encouraging self-reflection and setting achievable goals. Teachers who help students identify their strengths and weaknesses and set realistic goals can help them develop the self-discipline they need to succeed. Strict rules and regulations or criticism can create a negative and stressful learning environment that hinders self-discipline.

S94. Ans.(c)

Sol. The most effective way for a teacher to help students who lack motivation is to provide support and find ways to address the underlying issues. Teachers who take a proactive approach to motivation can create a positive and supportive learning environment that helps students develop the intrinsic motivation they need to succeed. Criticism or extrinsic rewards may provide short-term results but can damage intrinsic motivation in the long run.

S95. Ans.(d)

Sol. The most important quality of an ideal teacher is a positive and supportive attitude. Teachers who create a supportive and caring learning environment can help students feel valued and motivated to learn. Knowledge and expertise in the subject matter, good communication skills, and patience and empathy are also important, but a positive attitude is a foundation for effective teaching.

S96. Ans.(c)

Sol. An ideal teacher can engage all students in the learning process by encouraging student participation and offering opportunities for active learning. Teachers who understand their students' needs and interests can create a positive learning environment that motivates students to learn and explore new ideas. Focusing solely on academic content or extrinsic rewards may provide short-term results but can damage intrinsic motivation in the long run.

S97. Ans.(c)

Sol. The most effective way for a teacher to handle a disruptive student is to provide support and find ways to address the underlying issues. Teachers who take a proactive approach to behavior management can create a positive and supportive learning environment that helps students develop the skills they need to succeed. Ignoring or punishing the student may create a negative and stressful learning environment that hinders their development.

S98. Ans.(a)

Sol. The most effective way for a teacher to handle a consistently absent or late student is to provide support and find ways to address the underlying issues. Teachers who offer guidance and positive reinforcement can help students develop the self-discipline and intrinsic motivation they need to succeed. Criticism or extrinsic rewards may provide short-term results but can damage intrinsic motivation in the long run.

S99. Ans.(c)

Sol. The role of professional development in promoting professional commitment at the school level is to provide opportunities for continuous learning and growth. Professional development allows teachers and school leaders to enhance their skills and knowledge, which ultimately leads to improved outcomes for the school community.

S100. Ans.(b)

Sol. The role of schools in promoting social justice and equity is to provide support and resources for marginalized students. Schools should strive to create a positive and inclusive learning environment that supports the needs of all students, regardless of their background or experiences.
