निर्देश:(51-55) दिए गए गद्यांश को पढ़कर निम्नलिखित प्रश्नों के उत्तर दीजिए।

वर्तमान युग कंप्यूटर का युग है। यदि भारतवर्ष पर नज़र दौड़ाकर देखें तो हम पाएँगे कि जीवन के लगभग सभी क्षेत्रों में कंप्यूटर को प्रवेश हो गया है। बैंक, रेलवे-स्टेशन, हवाई-अड्डे, डाकखाने, बड़े-बड़े, उद्योग-कारखाने, व्यवसाय हिसाब-किताब तथा रूपये गिनने तक की मशीनें कंप्यूटरीकृत हो गई हैं। आज भी कंप्यूटर का प्रारंभिक प्रयोग है तथा आने वाला समय इसके विस्तृत फैलाव का संकेत दे रहा है। प्रश्न उठता है कि कंप्यूटर आज की जरूरत है? इसका उत्तर है - कंप्यूटर जीवन की मूलभूत अनिवार्य वस्तु तो नहीं है, किंतु इसके बिना आज की दुनिया अधुरी जान पड़ती है। सांसारिक गतिविधियों, परिवहन और संचार उपकरणों आदि का ऐसा विस्तार हो गया है कि उन्हें सुचारू रूप से चलाना अत्यंत कठिन होता जा रहा है।

पहले मनुष्य जीवन - भर में यदि सौ लोगों के संपर्क में आता था, तो आज वह दो - हजार लोगों के संपर्क में आता है। पहले वह दिन में पाँच - दस लोगों से मिलता था, तो आज पचास - सौ लोगों से मिलता है। पहले वह दिन में काम करता था, तो आज रातें भी व्यस्त रहती हैं। आज व्यक्ति के संपर्क बढ़ रहे हैं, व्यापार बढ़ रहे हैं, गतिविधियाँ बढ़ रही हैं, आकांक्षाएँ बढ़ रही हैं तथा साधन बढ़ रहे हैं। इस अनियंत्रित गति को सुव्यवस्था देने की समस्या आज की प्रमुख समस्या है। कहते हैं आवश्यकता आविष्कार की जननी है। इस आवश्यकता ने अपने अनुसार निदान ढूँढ लिया है।

कंप्यूटर एक ऐसी स्वचालित प्रणाली है जो किसी भी अव्यवस्था को व्यवस्था में बदल सकती है। हड़बड़ी में होने वाली मानवीय भूलों के लिए कंप्यूटर रामबाण औषधि है। क्रिकेट के मैदान में अंपायर की निर्णायक भूमिका हो या लाखों - करोड़ों की लंबी - लंबी गणनाएँ, कंप्यूटर पलक झपकते ही आपकी समस्या हर कर सकता है। पहले इन कामों को करने वाले कर्मचारी हड़बड़ाकर काम करते थे, एक भूल से घबराकर और अधिक गड़बड़ी करते थे। परिणामस्वरूप काम कम, तनाव अधिक होता था। अब कंप्यूटर की सहायता से काफी सुविधा हो गई है।

Q51. वर्तमान युग कंप्यूटर का युग क्यों है?

- (a) क्योंकि कंप्यूटर के बिना जीवन की कल्पना असंभव सी हो गई है
- (b) क्योंकि कंप्यूटर ने पूरे विश्व के लोगों को जोड़ दिया है
- (c) क्योंकि कंप्यूटर जीवन की अनिवार्य मूलभूत वस्तु बन गई है
- (d) क्योंकि कंप्यूटर मानव सभ्यता के सभी अंगों का अभिन्न अवयव बन चुका है।

- (b) कंप्यूटर कई मानवीय भूलों को निर्णायक रूप से सुधार देता है
- (c) कंप्यूटर के आने से सारी हड़बड़ाहट दूर हो गई है
- (d) मानव की सारी समस्याओं का हल कंप्यूटर द्वारा ही संभव है

Q53. गद्यांश के अनुसार, किस आवश्यकता ने कंप्यूटर में अपना निदान ढूँढ लिया है?

Directions (61 - 65): Read the following passage carefully and answers the questions given below it. Certain words are given in bold to help you locate them while answering some of the questions.

Astrologers habitually prone to goof-ups now have an excuse for why their predictions have been going haywire: the emergence of newer and newer planets that have caused their calculations to go awry. For the international team of astronomers who recently discovered eight new planets, the new arrivals are, however, a cause for excitement. Indeed, even as the rest of the world continues to be consumed by a morbid passion for shiny new war machines, deadly chemicals and sinister war tactics, astronomers have been doggedly searching the heavens for more heavenly bodies in the belief that the search will take us closer to a more **exalted** goal - that of knowing the truth about us and the universe. "Reality is much bigger than it seems...the part we call the universe is the merest tip of the iceberg", one scientist remarked. How true. In the beginning sceptics wouldn't accept that the earth actually moves, let alone that it revolves around the sun because of an unshaken belief that the earth was the center of the universe. We've come a long way. Today, scientists have spotted nearly 80 extra-solar planets using sophisticated instruments.

What's more, our universe may not be the only universe in the cosmos; there could well be several parallel universes teeming with many galaxies, solar systems, and planets, although none of this may be **perceptible** to the naked eye. Perhaps sages who say that truth is not easily perceptible, mean just this — that what is evidently before us is not the whole truth. Scientists say that "everything in the tangible universe has its shadowy counterparts in other, parallel universes".

In fact, it is by observing the play of cosmic light and shadow through powerful devices that scientists have been able to 'feel' shapes or 'see' shadows that indicate the existence of other heavenly bodies without actually seeing them. The international team of scientists involved in the present discovery conducted their search through telescopes in Australia, Belgium, the UK and the US. Two of the newly discovered eight planets are believed to have circular orbits very like the Earth's, while the others

have well-defined elliptical orbits much like Pluto's. This is significant because a planet with a circular orbit would more likely be hospitable to life forms than would one with an elliptical orbit. In the latter, the planet experiences extreme temperatures depending on whether it is **proximate** to or distant from the energy-giving star it's circumambulating. As in the case of other recent discoveries - such as finding traces of microbes in a meteorite - this too strengthens the belief that we're not alone in the universe.

So, would we be exchanging intergalactic e-mails soon? Perhaps not as yet, given that our closest neighboring galaxy is millions of light years away. What is within our immediate grasp, though, is exploring the **viability** of establishing human settlements in space — an Endeavour that has assumed urgency what with biological terrorism and the like threatening humankind on earth. As Stephen Hawking recently said, "I don't think the human race will survive the next thousand years unless we spread into space. There are too many accidents that can befall life on a single planet".

Q61. According to the author's belief, it can be inferred that all of the following are not true except

- (a) It is unlikely that the human race can survive the next thousand years.
- (b) It seems quite likely that the human race can survive the next thousand years.
- (c) Accidents will wipe out the human race from this planet by accidents within the next one thousand years.
- (d) Earth is the only planet with life.

Q62. According to the passage it can be inferred that:

- (a) Finding traces of microbes in a meteorite proves the existence of life on other planets.
- (b) Finding traces of microbes in a meteorite converted the belief into the truth that we are not alone in the universe.
- (c) Finding traces of microbes in a meteorite would make it possible to exchange galactic e-mails in future.
- (d) Finding traces of microbes in a meteorite made us think about exploring the viability of establishing human settlements in space.

Q63. According to the passage it can be inferred that
(a) A planet with a circular orbit is more likely to be hospitable to life than would one with an elliptical orbit because the latter experiences very low temperatures.

(b) A planet with a circular orbit is more likely to be hospitable to life form than would one with an elliptical orbit since the latter is proximate to the energy-giving star it is circumambulating.

(c) A planet with a circular orbit is more likely to be hospitable to life forms than would one with an elliptical orbit because the latter experiences extreme temperatures.

(d) Both (a) and (c).

Q64. According to the passage, we can infer that -

(a) Parallel universes are half truth and half is not perceptible

(b) Parallel universes are not easily perceptible because they are not the whole truth.

(c) Parallel universes are not easily perceptible and what we perceive is not the whole truth.

(d) Truth is always easily perceptible.
