World Hepatitis Day (July 28)

Theme: “Bringing hepatitis care closer to you”

Hepatitis means inflammation of the liver. The liver is a vital organ that processes nutrients, filters the blood, and fights infections. When the liver is inflamed or damaged, its function can be affected.

World Hepatitis Day (July 28)

Causes: Heavy alcohol use, toxins, some medications, and certain medical conditions can cause hepatitis.

Types: It is caused by a group of viruses known as the “hepatotropic” (liver-directed) viruses and can be of type A, B, C, D and E. It may also be caused by ‘Varicella Virus’ (which is responsible for Chickenpox)

Treatment: Hepatitis A and E go away on their own) and require no specific antiviral medications. For Hepatitis B and C, effective medications are available. The vaccine is available for Hepatitis B.

World Hepatitis Day (July 28)

Acute (inflammation of the liver that presents with sickness — jaundice, fever, vomiting)

Chronic (inflammation of the liver that lasts more than six months, but essentially shows no symptoms)

India:

India has 11% of the estimated global burden of Hepatitis cases. Hepatitis B has been included in India's universal Immunization Programme to provide free-of-cost vaccination.

World Hepatitis Day (July 28)

Global Target is to eliminate viral hepatitis as a public health threat by 2030.

Loktak Lake

Manipur government's Loktak Development Authority (LDA) issued a notice to remove/dismantle all 'athaphums' (circular fish culture ponds) and huts on 'phumdis' (floating organic mass) from the lake, in order to safeguard the environment and biodiversity of the lake.

It is the largest freshwater lake in Northeast India and is famous for the phumdis floating over it. Keibul Lamjao National Park is also situated in the same lake. The National Park is the only floating national park in the world and is the last natural refuge for endangered Sangai deer.

Production and area under jute has declined in India in the past decade, but in Bangladesh the cash crop has shown a significant rise

India's jute economy is faltering while Bangladesh's is flourishing

India is still the largest producer of jute but in terms of acreage, Bangladesh is the largest cultivator. It also accounts for nearly 75 per cent of the global jute exports, while India's share is just 7 per cent.

Reasons: Lack of market, government procurement and diversification, poor infrastructure as well as the sorry state of Indian jute mills is responsible for this.
