Read the passage carefully. The passage is followed by three questions based on the passage. Select your answer from the four alternatives given below each question.

Passage

The greatest enemy of mankind, as people have discovered is not science, but war. Science merely reflects the social forces by which it is surrounded. It is found that when there is peace, science is constructive. When there is war, science is perverted to destructive ends. The weapons which science gives us do not necessarily create war, these make war increasingly more terrible. Until now, it has brought us to the door step of doom. Our main problem, therefore, is not to curb science, but to stop war – to substitute law for force and international government for anarchy in the relations of one nation with another. That is a job in which everybody must participate, including the scientists.

28. According to the author, the real enemy of mankind is not science but war, because

(A) science during wars is very destructive

(B) science merely invents the weapons with which war is fought

(C) the weapons that science invents necessarily lead to war

(D) the weapons invented by science do not cause war, though these make it more destructive

29. War can be stopped, if
- (A) weapons invented by science are not used to launch a war
 - (B) science is restricted to be utilised only during war time
 - (C) science is not allowed to lead us to utter destruction
 - (D) we replace force and lawlessness by law and international government.

30. The expression "bring to the doorstep of doom" means

- (A) lead to the threshold of a new destiny
- (B) introduce to an unpredictable destiny
- (C) carry close to death and destruction
- (D) induct in a ruinous activity.
