	action-oriented targets, with the majority being highly relevant for the ocean.
<p>Genetic engineering gives mosquito control an upgrade</p> 	<p>Did you know?</p> <ul style="list-style-type: none"> • Scientists now have access to the whole genome sequences of multiple mosquito species, allowing us to genetically manipulate them. • Gene-drive technology is one such approach, which has been used in outdoor trials in India, Brazil, and Panama <p>Key points</p> <ul style="list-style-type: none"> • The fundamental idea behind genetic manipulation of mosquitoes is to systematically control their populations by interfering with their reproduction. • Scientists worldwide have developed various genetic modification approaches. A major one in this endeavour is gene-drive technology. <p>Gene-drive technology</p> <ul style="list-style-type: none"> • This technology was conceived by Austin Burt, professor at Imperial College London, in a 2003 paper published in Royal Society Proceedings. • In 2020 a genetically modified mosquito called OX5034 was released in counties in Florida and Texas. • Genetically modified male OX5034 mosquitoes mated with female mosquitoes but the self-limiting gene prevented female offspring from surviving. • Male mosquitoes would then disappear from the environment after around a dozen generations.
Mosquito-borne diseases	Malaria, Dengue/Dengue Hemorrhagic fever (DHF), Lymphatic Filariasis (Elephantiasis), Kala-azar/Visceral Leishmaniasis (VL), Japanese Encephalitis (JE), and Chikungunya.
Person in news: Jignesh Raval	<p>Key points</p> <ul style="list-style-type: none"> • Jignesh Raval is one of the best tennis coaches in the country. • The last two national women's champions Zeel Desai and Vaidehi Chaudhari have come from his stable in Ahmedabad. • Jignesh has had a rich experience grooming a lot of players with missionary zeal.
